INSTRUCTIONS FOR AUTHORS

Aims and Scopes
The Journal of Child Neurology (JCN) is an interdisciplinary peer-reviewed biomedical journal publishing articles in the fields of child neurology, pediatric neurosurgery, pediatric neuroradiology, pediatric neuroscience, child psychiatry, developmental and behavior pediatrics, pediatric neuropsychology, and developmental neurobiology.

General Instructions
All submissions (including invited material) are subjected to peer review. Authors are invited to submit original articles for consideration. Case reports can be submitted as brief communications. All material must be submitted online at the SAGETRACK ScholarOne website http://mc.manuscriptcentral.com/childneurology. New authors should use the “Create Account: New users click here” button at the submission website. After entering the website, go to the “Corresponding Author Center” to submit manuscripts, using the “Click here to submit a new manuscript” button. Manuscript text and tables must be prepared and submitted in Microsoft Office Word (MSWord) document format (saved as “.doc” files). Files to be uploaded should be complete final versions of the article text (including abstract and keywords), tables, and figures (photographs, art work, or line drawings); do not insert existing figures into the MSWord document file. At the completion of the upload of each file, a confirmation window will appear asking for a description of the file (for the main document, use language such as “article text” or “main document”; for figures, indicate a figure number, such as “Figure 1”; and for other supporting materials, indicate clearly what the file is).

Copyright
Submission of a manuscript to JCN is taken as evidence that the materials have not been submitted simultaneously elsewhere and that no part of the text or any of the figures has been copyrighted, published, or reproduced elsewhere unless information regarding previous publication is explicitly cited and permission obtained (a copy of such permission must be provided with the manuscript). Once a manuscript is accepted for publication, the corresponding author will receive an email containing a link to the SAGETRACK website to complete an electronic copyright transfer form. Alternately, the corresponding author can go to the “Corresponding Author Center,” choose the correct manuscript from “Manuscripts with Decisions,” and from the ACTION box on the far right side, choose “Contributor Form.” After reading the form and completing the appropriate boxes, clicking the “I accept” box will confirm appropriate copyright transfer.

Text
Manuscripts should follow the usual format for scientific articles and the format of materials recently published in JCN (examples can be found at the SAGE Journals Online website http://jcn.sagepub.com/). Authors must assure that manuscripts conform to the style guidelines of the AMA Manual of Style. Manuscript pages should be double-spaced and numbered consecutively with the appropriate subheadings used to designate different sections in the following order: title page, abstract, keywords, text, references, figure legends, and tables. Avoid use of all abbreviations or acronyms unless the abbreviation or acronym itself has become a word (e.g., DNA). Only generic names of drugs should be used. Clinical laboratory
data (including normal ranges) should be expressed in conventional units rather than SI (Système International) units, although SI units can be provided in parentheses. Authors whose native language is not English must have manuscripts carefully proofread and corrected for proper American English spelling, grammar, and syntax by a professional editor or colleague who is a native English speaker. Authors should retain for their own files at least one complete copy of all material submitted. Additional information on manuscript preparation can be obtained from a variety of sources including the website http://www.icmje.org/ or the following references:

Title page. The article title should be brief and meaningful. Following the title, there should be a listing of first and last names of all authors, along with highest academic or medical degrees and affiliations. Authorship should be limited to direct participants in the study. List the complete name, address, telephone number, fax number, and e-mail address for the corresponding author (authors who do not have an e-mail account can obtain one from among free sites such as “gmail.com,” “hotmail.com,” or “yahoo.com”). For multi-authored submissions, up to three authors can be designated as “first authors who contributed equally to this work” if the contributions of those individuals essentially constituted the majority of the work on the project. In addition, “mentors who contributed equally to this work” can be used to define a category of authorship for senior investigators, clinicians, or directors who equally provided the support and mentorship necessary for the success of the work. A separate paragraph of “acknowledgements” should identify where the work was done, the meeting, if any, at which the material was presented, and any assistance in writing the manuscript or other help that did not merit authorship (including “ghost authorship”). A separate “declaration of conflicting interests” should describe all potential conflicts of interest or commercial or other financial relationships of the authors, and a separate paragraph of “funding” should list all financial support for the studies.

Abstract. A factual abstract of no more than 150 words should be provided on a separate page in an unstructured format and should present the reason for the study, main findings, and conclusions.

References. Authors are responsible for correctness and completeness of reference citations. The reference list should be typed double-spaced and begin on a separate page. Reference citations should be arranged according to their order of appearance in the text, and indicated by superscript numbers in the text. References should be typed generally in accordance with the style of the AMA Manual of Style (examples shown below). Only the first four authors should be listed; when there are more than four authors, list only the first three followed by “et al.” Abbreviations of journal names should conform to the style in PubMed. Abstracts should be noted as such. Citation of websites should list the complete URL address and the date and month accessed. Sample references are given below.

Personal communications, unpublished manuscripts submitted but not yet accepted, and similar unpublished items should not appear in the reference list, but can be noted parenthetically in the text. If reference managers (such as EndNote) are used, the author must assure that the submitted manuscript has the references provided in the same plain text manner as the rest of the manuscript.

**Artwork Submissions**
Artwork includes charts and graphs, maps, photographs, line art, and tables with 17 or more columns. Electronic art should be prepared as sharp high-quality computer images with a minimum width of 2100 pixels and saved in uncompressed TIFF and JPEG file formats. Microsoft application files are acceptable for vector art (line art). For all scanned images, line art (black and white) images should be scanned as a bitmap at 900ppi and photos should be scanned as grayscale or CMYK at 300ppi. Graphs should be submitted as figure files and should be finished drawings, not requiring further artwork. All patient identifiers must be removed from pictures of radiographs or other imaging modalities. Recognizable photographs of patients must be accompanied by written permission for publication. Reproduction of any previously published illustration must be accompanied by written permission from both the original author and publisher. Figure legends should include full explanations of the figures and be typewritten double-spaced with numbers corresponding to those on the figure files themselves. Abbreviations appearing in figures must be fully identified in the legend. All figures must be specifically referred to in the text and numbered in order of appearance in the text. Color photographs or illustrations will be published in the online version at no cost to the authors; however publication of color images in the print version will be charged to the author at a cost of $800 for the first figure and $200 for each additional figure.

**Tables**
Tables should be numbered consecutively corresponding to in-text citation. Each table should be prepared on a separate page at the end of the text document and preferably should be no larger than a single page. Include a brief descriptive title of the table and a footnote with explanation of any abbreviations. All tables must be specifically referred to in the text and numbered in order of appearance in the text.

**Conflict of Interest**
Authors must disclose any commercial, financial, or other associations that could pose a conflict of interest in connection with their submitted article and these must be disclosed on the title page at the time of submission.
