

ePocrates

Click [here](#) to access the ePocrates site. You will see on the right hand side, a sign that says “Free Download”

Now again, on the right hand side, there will be a big green button saying “Download”. Click on that button.

The next screen asks you for what type of handheld and computer you have. Yours is a Windows Mobile Pocket PC. It also asks for your type of computer. Select the appropriate button, then click on continue.

SPECIAL OFFER

Upgrade to Epocrates Essentials for only \$105 (a 30% discount)!

Yes, I want this offer | **No, please continue with Epocrates Rx (free)**

(This advertisement may come up asking you if you want to purchase an enhanced version, you don't need to in order to get the tool we are recommending. Feel free to click on “No, please continue with Epocrates Rx free”.)

The next step requires you to create an account. You will need to provide your e-mail address to create this account. Once you have provided the necessary information, you will come to a page that offers you resources particular to the information you have provided them. Select the resources you feel will be beneficial for you, then click Continue.

Now you will have a choice for using a wireless connection or a cable connection to install the program. Make your selection and click Continue.

The final steps are;

1. To click on Begin Download,
2. When and if the screen pops up asking you to run or save the program, click on Run, now you will need to click on “Next” a few times to accept the defaults for this program.
3. Then Sync your device by clicking on the little green circle (🌐) in the lower left hand corner of your computer screen and selecting “synchronize”.
