Welcome to the Creighton University Division of Allergy & Immunology. We are a division in the Department of Internal Medicine, Creighton University School of Medicine. Our Division is comprised of several elements including clinical practice, basic science and clinical research, an Allergy and Immunology Fellowship Program, and a basic science graduate program. The success of our Division is made possible by the combined efforts of all team members of the Division including faculty, staff, fellows-in-training, post-doctoral fellows, graduate and undergraduate students. Our primary goal is to provide quality patient care and education and to advance our understanding of the pathogenesis and treatment of allergic and immunologic diseases. Through clinical and basic science research, we are able to provide our patients with the newest advances in medicine to better manage their diseases and improve their quality of life.

Our primary hospital affiliation is through Creighton University Medical Center. Our highly trained physicians offer adult and pediatric outpatient clinic services not only at the Creighton University Medical Center location, but also at Ehrling-Bergquist Hospital (Offutt Air Force Base), Veteran’s Administration Medical Center, Children’s Hospital, and Montgomery County Memorial Hospital in Red Oak, Iowa.

Our Division offers treatment for the following diseases:
- Acute and chronic otitis media
- Acute and chronic urticaria
- Acute sinusitis
- Allergic asthma
Allergic bronchopulmonary aspergillosis
Allergic conjunctivitis
Angioedema
Asthma in pregnancy
B cell immunodeficiencies
Bronchitis
Common variable immunodeficiency
Contact dermatitis
Drug allergy
Exercise induced asthma
Food allergy and food hypersensitivity
Immunizations and immunoprophylaxis
Insect allergy
Latex allergy
Management of immunotherapy
Non-allergic asthma
Nasal polyposis
Perennial allergic rhinitis
Seasonal allergic rhinitis
Status asthmaticus
T-cell immunodeficiencies
Vasomotor rhinitis
Urticaria

The following Procedures and Equipment are Available:
Exercise challenge
Methacholine challenge
Bronchoprovocation Challenges
Digital Electrocardiography Machine
Immediate and Delayed Hypersensitivity Skin Testing
Immunotherapy
Nitric Oxide Measurements (oral/nasal)
Oral Desensitization
Phlebotomy
Radiology Suite for Routine X-Rays, MRIs, CTs, Nuclear Studies
Spirometry
Treadmill Exercise Testing
