Next Available Fellowship Position: July 1, 2009
Application Deadline: January 31, 2008

The Creighton University Division of Allergy & Immunology Fellowship Training Program develops well-trained physicians who can translate the wealth of knowledge gained during their fellowship to the clinical care of patients with asthma and allergic and immunologic diseases. The Program is an ACGME accredited, comprehensive two-year fellowship which prepares those physicians, BE or BC in Internal Medicine or Pediatrics, for the American Board of Allergy and Immunology certifying examination.

Description of Fellowship Program
The Creighton Allergy and Immunology Fellowship Training Program is designed to provide intensive clinical exposure to a wide range of problems seen by an Allergy and Immunology specialists, including the range of disorders common to adults and children.

The Division of Allergy & Immunology is actively involved with clinical and basic research projects, and the fellows-in-training are active participants in this process. In addition, adequate time during the fellowship is available to undertake individual research projects.

Formal teaching includes a weekly review of pertinent allergy-immunology topics during the Allergy & Immunology Grand Rounds, bi-weekly Abbas Journal Club, and a monthly journal club reviewing the Journal of Allergy and Clinical Immunology. Ample opportunities are available for grand-rounds and research conferences in both Internal Medicine and Pediatrics.

Completion of our two-year fellowship will prepare the candidate for certification by the conjoint Board in Allergy-Immunology.

Eligibility, Selection and Hiring
